(54) Title: METHOD AND SYSTEM FOR MANAGING DIGITAL RIGHTS

(57) Abstract: In the method of the invention, a request for a digital right to an encrypted content item is transmitted to a server (61). The request contains a circuit identifier identifying an integrated circuit and a content identifier identifying the encrypted content. Subsequently, an encrypted digital right, being encrypted by using a public key associated with the integrated circuit, is received from the server (61). Furthermore, the integrated circuit is instructed to decrypt the encrypted digital right by using a private key associated with the integrated circuit and to store the digital right in the integrated circuit. The private key is being stored in the integrated circuit. The system of the invention contains a client (63) performing the method and a server (61) as referred to in the method. The electronic device 10 performs the method of the invention.
